

Rider Benefits For You and Your Business

Rider is a fast and feature-rich cross-platform .NET IDE based on ReSharper and IntelliJ Platform, with a deep understanding of all .NET languages and technologies. Making developers productive is a core principle of all JetBrains products. Rider goes further and proves to be a great asset not only for software engineers, but also for your whole software development business. It provides the necessary intelligence, code insight and productivity to give your business a competitive advantage on three organization levels:

- **Benefits for developers**
- **Benefits for project managers**
- **Benefits for business**

These benefits only get better with each new Rider release. Customer feedback is vital for us, and we actively seek and act upon it. Time and again our customers are amazed at just how quickly we implement their suggestions thanks to flexible approach, short release cycles, many maintenance updates, and stable early access versions of our software.

Benefits for developers

- **Enjoy IntelliJ Platform**

Rider uses the UI and many features of IntelliJ Platform, which powers IntelliJ IDEA, WebStorm, and other JetBrains IDEs loved by millions of developers.

- **Save time on compilation, locating and fixing errors**

Rider instantly detects and highlights compiler errors, possible runtime errors and code smells, and helps resolve most of the discovered issues automatically.

- **Routine manual tasks – automated**

Developers can instantly produce boilerplate code such as constructors, properties, overriding members, delegating and equality members, and much more.

- **Handy hints and code insights**

No more time wasted on switching to other tools or consulting documentation.

- **Neat and clean project structure**

Rider advocates best development and design practices, focused on reducing duplication and improving your coding practices.

- **Instant project-wide navigation**

Developers can jump to any part of their code in a second, with dozens of smart navigation and search features.

- **Handle multi-language solutions with ease**

Rider supports most languages used in .NET development, including C#, VB.NET, F#, ASP.NET's Razor syntax, XAML, XML, JavaScript, TypeScript, JSON, HTML, CSS, and SQL.

- **Additional functionality**

Rider's rich plugin repository contains a wide array of plugins originally developed for IntelliJ Platform and ReSharper.

- **Comprehensive and fast support**

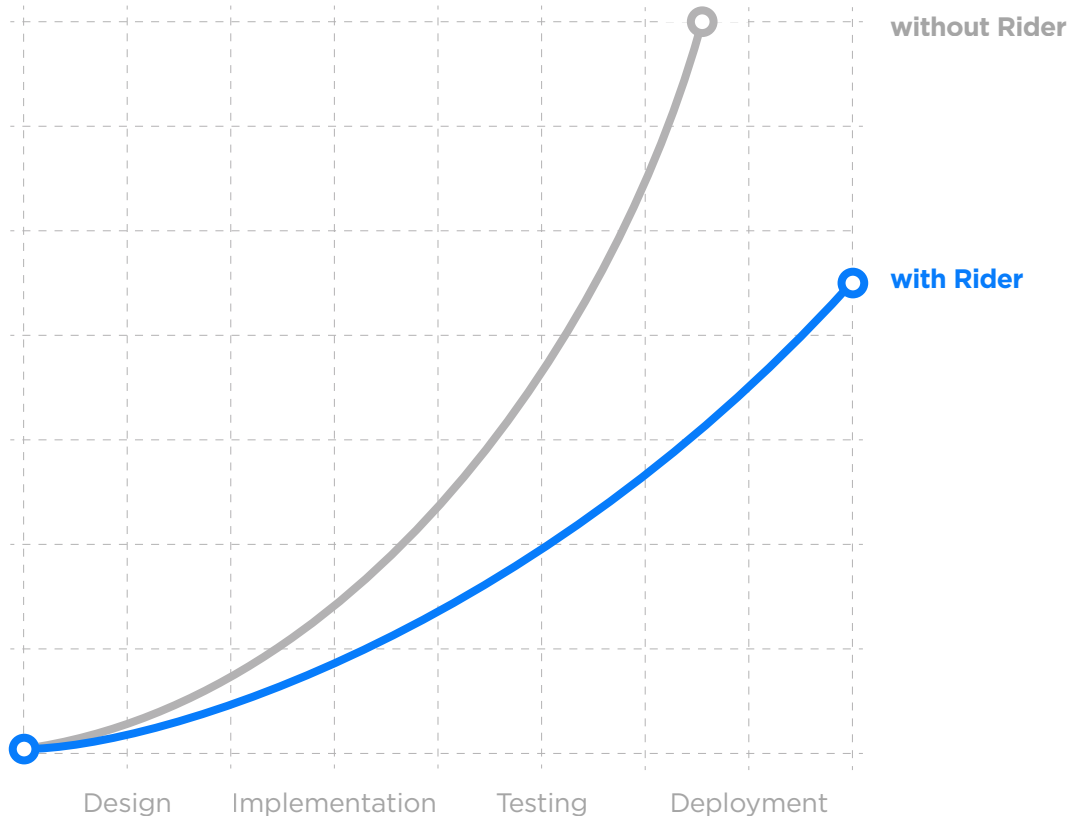

Detailed documentation, video, and text tutorials are provided. For any questions a developer may have, they can get quick and helpful email support at any time.

Benefits for project managers

- Have new code developed faster, with higher quality & maintainability and fewer errors.
- Feel confidence in change, as understanding, updating, and refactoring existing code gets easier.
- Eliminate bugs and problems at the early stages and prevent many potential problems in production.
- Keep code standards compliant, organized, and easily discoverable across your team or the whole organization.
- Get on-site training or remote, webinar-based sessions for your team to use the full power of IDE.

Higher code quality eventually reduces maintenance and development costs, as the cost of correcting errors and bugs grows exponentially with the complexity of the product or solution. It is much more cost-effective to fix bugs as early as possible. For example, a bug discovered during testing may require changes on the design and architecture level, leading to much greater costs. Rider allows you to reduce the expenses of making changes, and in many cases sharply cuts the incidence of costly errors.

Benefits for business

Remarkable Return On Investment (ROI)

According to our internal research, Rider users report a 23% to 50% increase in their productivity when using Rider, in comparison with other IDEs or text editors.

Make your development more cost-effective

Producing higher-quality code with Rider means you eradicate a lot of the problems that require reworking code.

Meet delivery schedules

Help your project managers meet delivery deadlines by making your developers more productive.

Utilize your resources more efficiently

Deliver larger projects faster – with the same team size.

Enjoy flexible licensing policy and bulk discounts

All JetBrains desktop tools are available under a flexible subscription-based licensing model. You can get a monthly or yearly subscription for one product or for all tools with the All Products Pack. In addition to standalone, Rider has more licensing options: ReSharper Ultimate + Rider subscription bundle for smooth migration from Visual Studio to Rider. Every yearly subscription comes with a perpetual fallback license that allows you to use a certain version of a product even without an active subscription. You can qualify for 20% discount on the initial price when extending a subscription for the second year, and 40% discount for the third year and onwards. Moreover, if you have an existing ReSharper Ultimate subscription, you can upgrade it to Rider + ReSharper Ultimate and keep the continuous subscription discount that you have earned before upgrading.

	Month	1st year	2st year	3st year	Total expenses for 3 years
Visual Studio Professional (standard subscription)	—	\$ 1,199	\$ 799	\$ 799	\$ 2797
Rider	\$ 34.90	\$ 349	\$ 279	\$ 209	\$ 837
ReSharper Ultimate + Rider	\$ 44.90	\$ 449	\$ 359	\$ 269	\$ 1077
